

**Classic Facial,** By Paulina Dorantes.

Our body reflects how we feel. It's the mirror of our inner physical and mental health, that's why, among other reasons, we need to take care of it and love ourselves.

The smell of mint enters my nose and travels through my whole body. Pads with special tonic are already working on my eyes area while Angy, my massage therapist, prepares the rest of my face for a classic facial. Can you guess where I am? Yes, at my favorite place! RenovaSpa's cabins.

Smog, sun and even our bad food habits damage our skin every day. This is the reason; we should take treatments like facials on regular basis. The recommended treatment period for facials is 22 days, which will help us take care of our facial health, as well as pamper ourselves, as we deserve it.

As a result, my skin feels much more youthful, like 10 years younger! This effect is caused by the use of professional Pevonia products, and the most important thing - the correct application of it. Angy knows every movement to penetrate all of our facial muscles to awaken them, not only causing a perfect cleansing but also the movement of our muscles. This last part helps them to be more elastic and smooth.

Besides the health benefits of a facial to our skin, let me tell you that having a facial massage is blissful, so much that if I was a cat I had purred during those entire 50 minutes of my massage.
